

KN Tech Law Roundup

Summer edition 2024

Dear ,

Welcome to the Summer 2024 edition of our Tech Newsletter.

At London Tech Week last month, one couldn't move for product and predictions influenced by the recent, exponential growth in AI development. Below are links to a number of blogs and articles in which we consider various topical matters generated by the emergence of AI.

Whilst the UK AI regulation was not considered priority legislation in the recent King's speech, it was referenced and it remains very much front of mind for the new Government – we ask how should businesses [look to comply across different AI regulatory regimes](#), we consider [the impact of National Security on investments in and acquisitions of AI businesses](#) and look at the [benefits and risks of using AI in recruitment](#).

Our Immigration team has written a topical piece on the [options and obstacles for tech startups wishing to apply for visas](#) given the unravelling UK immigration policy, while we also continue our [Legal Agony Aunt for Tech series](#), which this edition focuses on immigration, IP and investment issues.

Please do get in contact with any of the team with your feedback and suggestions for future topics you would like covered, or if there is anything in this edition that you would like more information on.

Kind regards
The KN Tech Law team

IP & regulation for startups with Kingsley Napley

The latest Angel Academe online sessions looks at all things IP and regulation related for investors in, and founders of, startups. The session was chaired by Kingsley Napley's [Mei Chung](#), who spoke with our legal expert [Caroline Sheldon](#) and Angel Academe investors Helen Jones and Bob Mollen.
